

TESIS 3300-5100 ROLL-SLITTER WITH ROTATING BLADE

Electrical sturdy and practical roll-slitter. It allows slitting of rolls of different materials, in an extremely precise and easy way.

- > Roll-slitter designed to slit rolls of different heights rapidly and accurately
- > It allows reducing the volume of your stock by keeping only full width log rolls and by reducing the waiting time of the material to be slit to the desired width
- > Digital display of cutting measurement (optional)
- > Pneumatic easy loading device for heavy roll changeover
- > Control system made by a PLC
- > Circular cutting blade Ø 315 mm (12 in.) with full protection with gradual uncovering during slitting process: one for Tesis 3300 model, two for Tesis 5300 model
- > Integrated lubrication system of the cutting blade

SUITABLE FOR:

- Vinyl film
- Coloured film
- Reflective material
- Application tape
- Double-side adhesive
- Protection film for lamination
- Printing media material
- Polyethylene
- Polypropylene
- Many more..

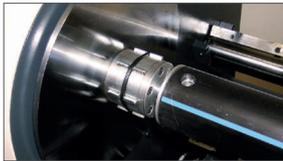

Comfortable hand grip with start push-button

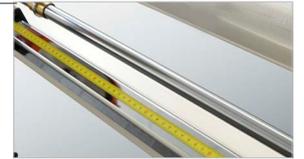

Digital display for cutting measurement (optional)

Braking assembly for the cutting blade suggested for cutting fabrics and other particular materials (optional)

Pneumatic locking system of spindle with expansion devices
